

October 2024

## Well Women Exams

Annual exams should be an important part of all women's routines. Getting to know your women's health provider, sharing your history and potential risk factors for disease, are key to planning for screenings and prevention.

### Available close to home at Prowers Medical Center:

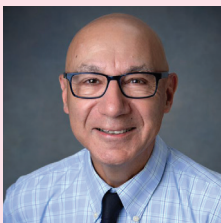

#### Early detection:

Well Women Exams  
Mammograms

#### Treatment:

Surgery (biopsies)  
Infusion Therapy

## Meet Dr. Korkis

Christian Korkis, MD  
OB/GYN

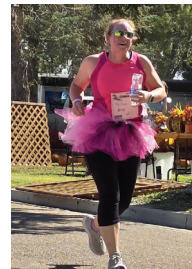

“I had such an amazing experience giving birth to my 3rd baby. Dr. Korkis was my doctor. My husband and I both loved him. He was very kind, professional, and respectful!”  
— PATIENT

## We're Embracing Pink this Month!

### October is National Breast Cancer Awareness Month.

According to the National Breast Cancer Foundation, more than 360,000 people will be diagnosed with breast cancer in 2024. Early detection is the best way to increase survival.

Prowers Medical Center recently received MQSA (Mammography Quality Standards Act) certification, so patients can feel confident that mammograms performed at PMC are of the highest standards.

PMC team members participated in the "Beers and Brats for Boobies" 5K event.

## Convenient Care

Available on Tuesday and Wednesday evenings from 5–7 pm, Convenient Care is here for sick patients with symptoms or illness appearing the day of, or within the previous 1–2 days.

**Appointments must be scheduled at 719-336-6767.**

Convenient Care is not for establishing care, chronic pain visits or medication refills.

## Medicare vs. Medicare Advantage

Open enrollment, either to start or make changes to your existing Medicare plan, is October 15 – December 7, 2024.

We encourage you to know your options, including which plans offer the most flexibility to use your local healthcare providers.

We've posted a comparison chart on our website [here](#)
